

ChemAxon User Group Meeting, Budapest 2011

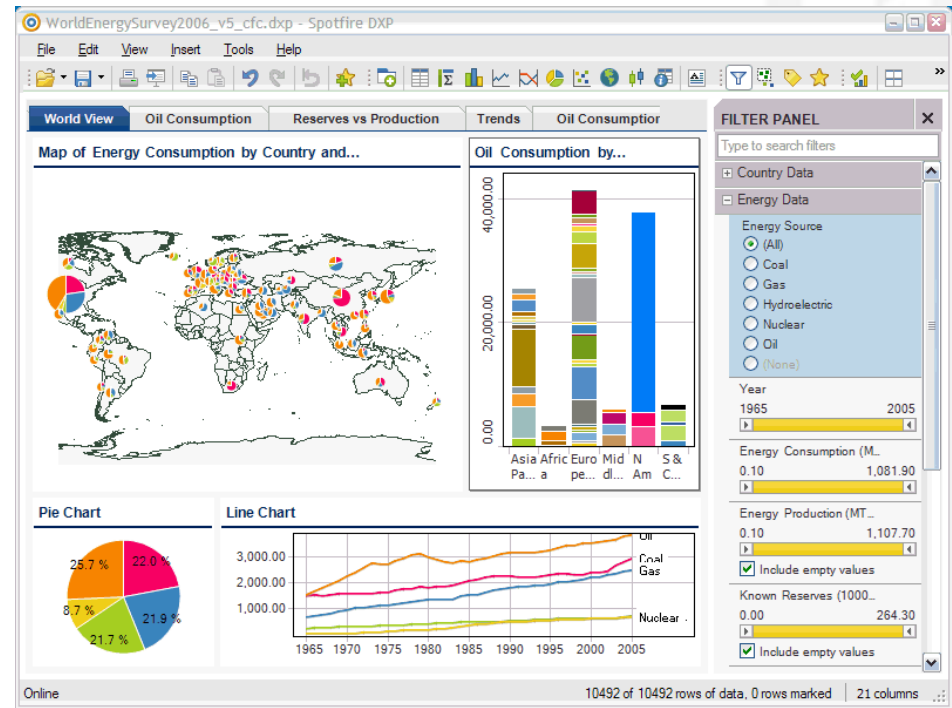

High Speed SAR Analysis with TIBCO Spotfire

Dr. Christof Gänzler, Sr Solutions Consultant

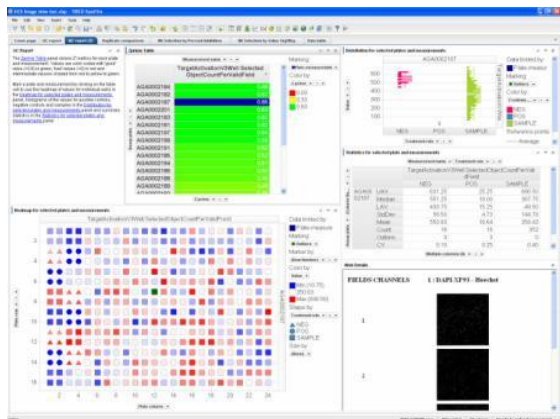

What is Spotfire?

- Unique interactive visual analytics to spot trends, outliers and other hidden relationships in data
- Applicable to many different types of data
- Easily accesses data from multiple, disparate sources (Oracle, Excel, SAP, etc.)
- Helps deploy best practices
- Extensible platform with an open SDK

TIBCO Spotfire: One Platform, Many Applications

HCS, HTS

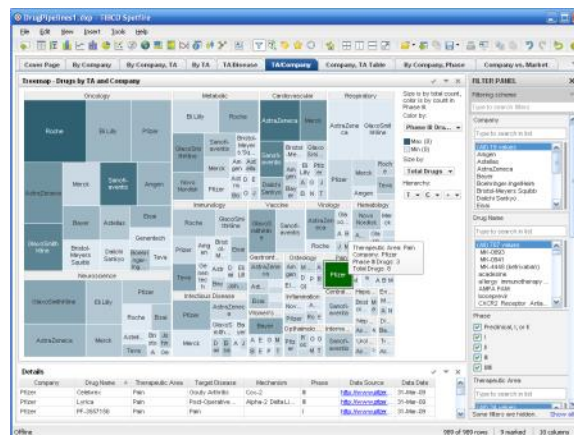

Project KPIs

Kinase Inhibitors

SAR

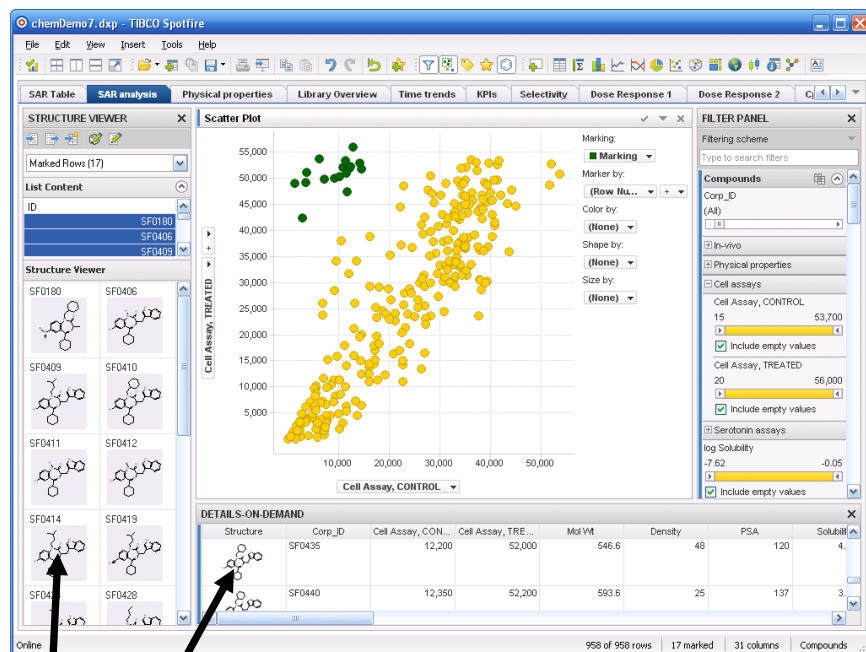

Competitive Intelligence

Gene Expression

Spotfire Integration with ChemAxon

Spotfire Client

MarvinView

JChem Cartridge

Chemistry Project Dashboard

For: Team Leaders, Project Managers, Scientific Management

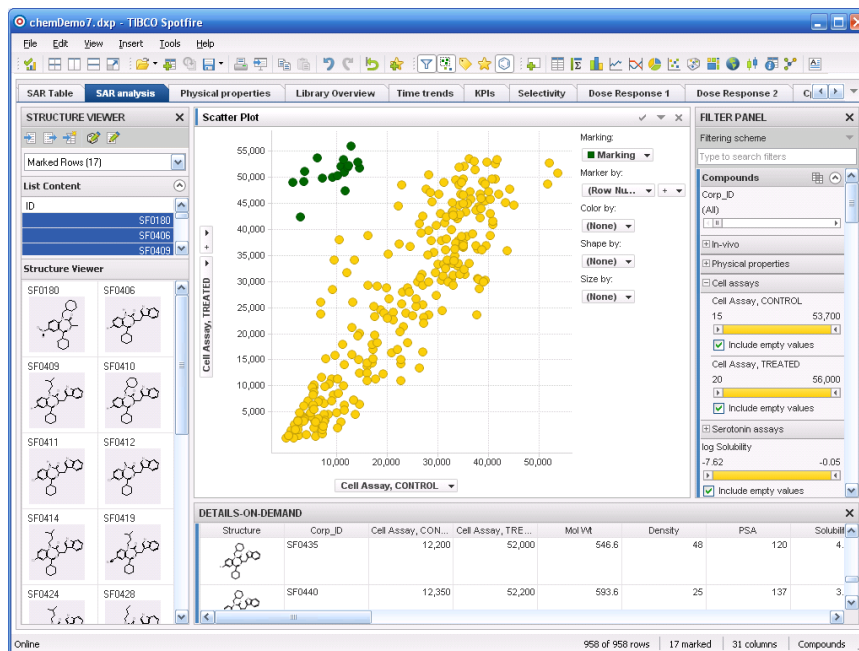

- How is my project doing vs. goals?
- Which series looks most promising?

SAR

For: Medicinal Chemists, Computational Chemists, Biologists

- Are there trends? Outliers?
- What's the structural basis for observed activity?
- What should I make next?

Selectivity Analysis

For: Screening Biologists, Lead Chemists

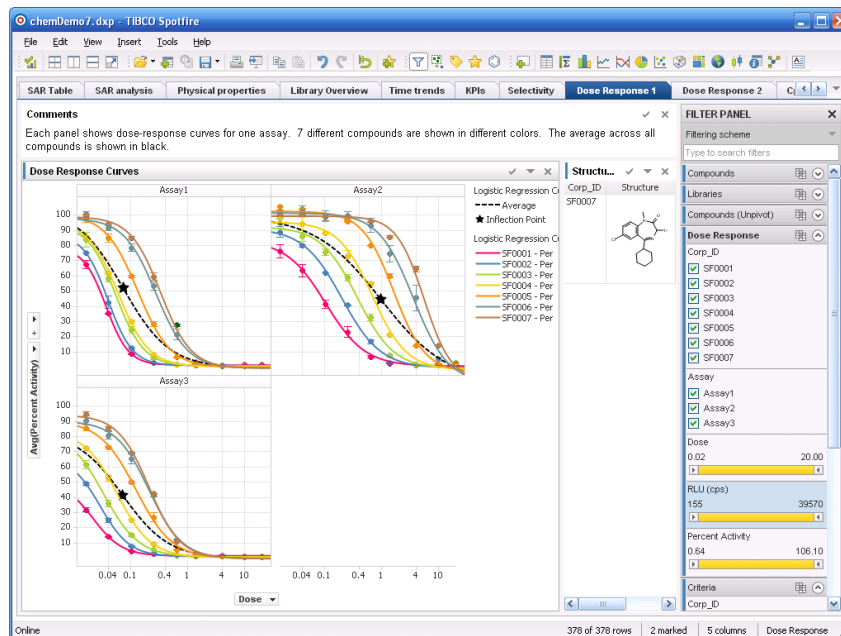

- How do my compounds behave across targets?
- Which compounds are selective, and why?
- Which compounds should advance?

Dose Response

For: Screening Biologists, Team Chemists

- How do my lead compounds behave in different assays?
- How do my lead compounds compare to a reference compound?
- How reliable are my IC50 values?

High Throughput Screening

For: Screening Biologists, Team Chemists, Team Biologists

- How do I detect systematic quality issues?
- How do I identify hits?

Competitive Analysis

For: Researchers, Managers

- Where is my company strong and weak?
- What therapeutic areas, diseases, mechanisms are best to target?
